

NEW FOR
2020!

Now with ProTech™/FPC

Now the best FRTW just got better! Introducing FlameTech™ with ProTech™/FPC, a specially formulated water repellent to compliment the superior performance of FlameTech high performance FRTW.

ProTech/FPC has been added to help reduce the effects of exposure to rain and snow during the construction process*.

ProTech/FPC helps to reduce flame retardant leaching and minimize the weathering deterioration, such as plywood warping and delamination.

Why settle for the ordinary when you can have the best? Demand FlameTech with ProTech/FPC.

Benefits of Using FlameTech Products:

- Code compliance: IBC 2303.2, E119, E84, E2768-11
- INTERTEK, UL, and QAI certified
- ICC ESR-4056, CCRR-1088, and LARR-26119 certified
- Cost-saving building solutions (Type 3 & 5 construction)
- 1- and 2-hour exterior bearing wall assemblies
- No mineral wool or high-density insulation required
- Superior strength values
- Shear wall ready
- Pressure impregnated; KDAT dried
- Certified for interior FRTW applications
- VOC free
- Tinted red for simplified inspection
- Insecticide Xtra also available
- Best-in-class customer service and technical support
- Nationwide delivery

* Even though FlameTech with ProTech/FPC has unprecedented weathering performance, it is still an interior product and unsuitable for exterior applications. Use ordinary precautions for storage and handling for interior FRTW.
